

# Project Profile

## Employee overflow parking

The Applewood Inn had a dilemma. The woody retreat, tucked away in the shelter of towering redwoods in the Russian River Valley, wanted to keep its grass employee overflow parking area, but the soaking rains of autumn would render the lot exceptionally slippery and, at times, unusable. The inn selected Typar Grassprotecta to save the day. Designed to withstand up to 8 tons / axle, while providing increased traction, Typar Grassprotecta provided the reinforcement and slip resistance necessary for Applewood Inn to reclaim the lot without excavation or soil removal.

### Quick Facts

- Project: Applewood Inn
- Location: Guerneville, CA
- Application: Employee overflow parking
- Product: TYPAR Grassprotecta
- Install Date: October 2012
- Designer: Applewood Inn
- Installer: Applewood Inn
- Project Size: 3,200 Square Feet
